Auto Installation System

Your television set is provided with an Automatic Installation system which makes Installation easier.

This new system is activated when you turn on the TV for the first time.

Procedure:

1. Connect the antenna jack in the antenna input terminal on the rear side of your TV-set. Then connect the TV power cable to a 220 ~ 240V system.
2. Press the main power button ⃝I, on the right hand side of the TV set, and the AUTO INSTALLATION message will appear on the screen.
3. Put batteries into the remote control and follow the instructions on the screen.

The TV will go through the following steps Automatically and sequentially:

Lingua: To select the language of the menus: ENGLISH (ENGLISH), DEUTSCH (GERMAN), NEDERLANDS (DUTCH), FRANÇAIS (FRENCH), ITALIANO (ITALIAN), ESPAÑOL (SPANISH), DANSK (DANISH) SVENSKA (SWEDISH), NORSK (NORWEGIAN), SUOMI (FINNISH), PORTUGUÊS (PORTUGUESE).

Country: To select the country.

Automatic Channel Sorting System (ASS): The TV set SEARCHES FOR FREQUENCIES, memorises the channels found, and sorts them (according to technical criteria) from Pr-01 of the TV, to a maximum of 99 programmes.

Editing: When the AUTOMATIC SEARCH has been completed, the list of memorised programmes appears. In this menu, you can change the order of the channels and change or give the channels a four letter name.
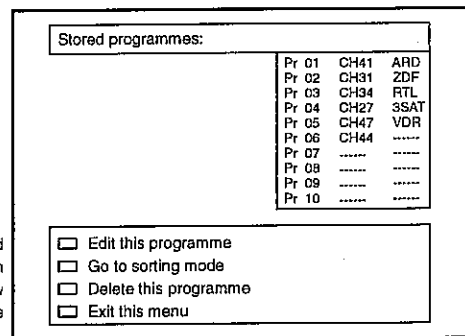

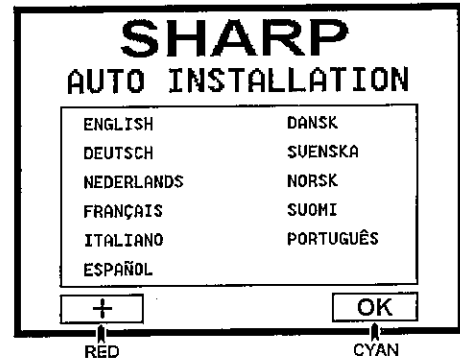

NOTE: You may not have to follow this procedure if it has already been done for you at the establishment where you purchased your TV. If this is the case go on to the section entitled «Switching ON».
If you need to repeat the AUTO INSTALLATION, read on.

Automatic TIME adjustment: If a programme with teletext is being received, the real TIMER can be adjusted automatically with the signal's clock. (To syncronize Real-Timer, press Text/Mix button ▤ / ▨).

Important: If a signal via satellite is being received, or if correct time cannot be obtained, the time will have to be adjusted manually.

Manual TIME adjustment: To adjust the time manually, this should be done with the 0 to 9 digit buttons.

6.2.c. Adjusting the SWITCH ON. Once the real-TIME has been adjusted, the SWITCH ON can be set with the 0 to 9 digit buttons.
The MENU button ● is used to cancel the SWITCH ON function.

7. Press the TV button ● to close the FEATURES Menu.

8. Press the POWER button to switch on Stand-by Mode.

* As a safety precaution, in the case of nobody being home when the television switches on automatically, the television will disconect itself automatically within 120 minutes; if it is to continue to run, any button of the remote control functions should be pressed.

Note: In the event of a power cut, disconnection from the plug or television switch, all the data on the ON TIMER will be cancelled.
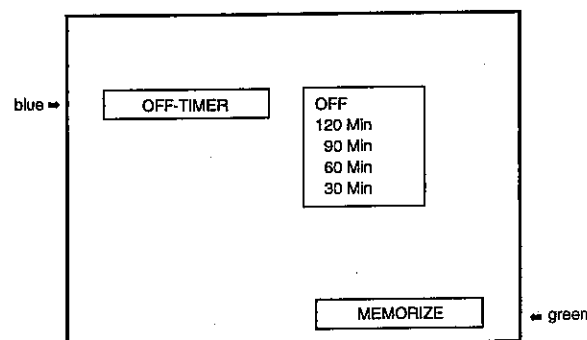

OFF TIMER

The OFF TIMER automatically switches the TV set to standby mode after a predetermined period, (30, 60, 90 or 120 minutes).

6.3.a. Pressing the Cursor UP/DOWN buttons ▲ / ▼ , select the desired period. Select OFF to disconect off-timer. The red point mark indicate the selected item.

6.3.b. Press the MENU button ● to memorize it.

7. Press the TV button ● to close the FEATURES Menu.

TELETEXT Mode

Ⓐ What is Teletext?

Teletext is an information service, organized like a magazine, which is provided by some television stations in addition to regular television broadcasting. Your television recives special Teletext signals broadcast by a TV station, processes the information and displays it graphically on the screen. News, weather and sports information, stock exchange prices, program preview and closedcaptioning for the deaf are among the many services available through Teletext.

Teletext information is organized much like a magazine: according to pages and sub-pages. The basic unit of displayed information is the page. A sub-page is one of a series of pages.

Teletext reception is controlled by using the remote control. Refer to the appropriate button descriptions for operation of the Teletext functions.

Ⓑ Teletext features

Depending on the TV programme, every Teletext page is transmitted using a different system. Your SHARP TV is adjusted to receive two Teletext system, namely TOP and FLOF, which are automatically identified by the receiver.

Common system in GERMANY is TOP but you can receive from satellite some FLOF TEXT transmissions. The user can easily identify them, by the manner in which they appear on the screen.

TOP
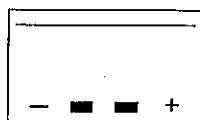

FLOF / LIST

Ⓒ To swutch on and switch off the Teletext

Select a TV channel which is broadcasting the teletext programme you would like to watch. Then press the TEXT/MIX (▤ / ▨) button to select the teletext mode. Press the TV button to go out from Teletext mode.
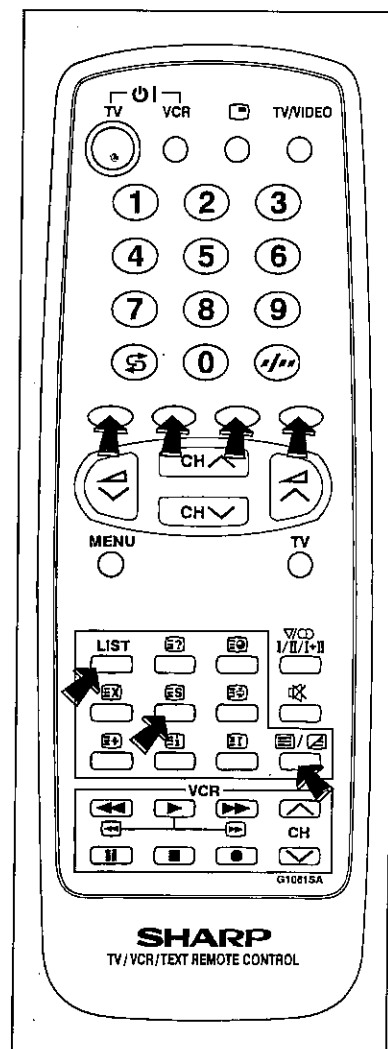

Teletext Page memory List

Ⓓ Operation...

LIST:

a) Come memorizzare una pagina

YourTV has 44 teletext page number memories for fast recall of teletext information.

In programme positions 1 through 10, four teletext page numbers can be stored in each position; a total of 40 pages.

In programme positions 11 through 40, only one programme with 4 page numbers can be stored. If you try to store more than 4 page numbers in a programme position between 11 and 40, the previously stored page numbers will be erased. Select the programme channel number into which you want to store teletext page numbers.

1. Press the TEXT/MIX (▤ / ▨) button to enter the teletext mode.

2. Press the LIST button to change from TOP or FLOF system to LIST mode.

3. Press a coloured button corresponding to the coloured brackets on the screen for page number storage.

4. Enter the teletext page number using the 0~9 digit buttons (enter three digits) or channel selector (CH V / CH ∧) buttons.

5. Repeat steps 2. through 4. until the numbers for the desired pages have been entered.

6. Press the store ▤ button to memorize the page numbers if you want. The symbol ▤ appears on the screen.

7. Press the TV button to exit the teletext mode.
